ENVIROMENTAL IMPACT ASSESSMENT: AN APPROACH TO PUBLIC HEALTH MANAGEMENT

Grin Verlag Gmbh Nov 2013, 2013. Taschenbuch. Book Condition: Neu. 210x148x2 mm. This item is printed on demand - Print on Demand Titel. Neuware - Scholarly Essay from the year 2013 in the subject Health Science, grade: 3, Atlantic International University, course: Environmental Health, language: English, abstract: Our environment is a key defining factor that can be used to establish and to predict the health status, economic progress and downfall, social and economic development, human interactions and quality of regulation and policies operating in the given community or at the national level. Though environments may vary from one to another in terms of health status, bio-diversity, pollution, and extent of exploitation by human activities, economic value but yet in even when these factors are present all environments share a fundamental feature which is their ability to support life and hence they provide reliance for man's natural existence. Though science and technological advancements are changing the trends in environmental support and reliance to man's existence, yet all these inventions are always aimed at devising means of increasing and boosting the support of the environment towards man and for his well being. Any threats and endangering of the human environment both to the biotic and a biotic components does not actually exert its effect on the environment itself but rather onto those that are supported by it. The concept or idea is that the environment only exists for our good and t no time or extent has the environment turned negatively impacting to man unless destabilized by man himself. This idea therefore, is elaborate of the implications of man to the environment and not that of the environment because it is man who is supported first or in other words human existence emerges from the environment. Science has it well explained through...
