IN-FURNACE MEASUREMENTS AND MATHEMATICAL SIMULATION STUDIES FOR THE OPTIMISATION OF SMALL SCALE WOOD COMBUSTION SYSTEMS

Shaker Verlag Nov 2005, 2005. Taschenbuch. Book Condition: Neu. 21x14.8x cm. Neuware - The objective of the present Ph.D. thesis is a detailed investigation of combustion processes within small- and medium-scale wood-burning systems. The work focuses on the provision of guidelines for experimental and numerical investigations and detailed data contributing to optimisation studies. Thereby, a considerable reductions of gaseous emissions like CO and unburned hydrocarbons are required. For the characterisation of the combustion behaviour by measurements detailed information about the...

Reviews

This written publication is wonderful. It really is simplified but unexpected situations inside the fifty percent in the pdf. You will not truly feel monotony at any moment of the time (that's what catalogues are for about in the event you request me).

-- Dr. Jamar Willms

This publication will be worth purchasing. It is written in straightforward words and not hard to understand. I am just very happy to explain how here is the best ebook we have read in my own lifestyle and might be the best publication for at any time.

-- Devante Mante
