Anshan Ltd. Paperback. Book Condition: new. BRAND NEW, Clinical Research Methodology and Evidence-Based Medicine, Ajit N. Babu, This is an introduction for novices to the fields of research methodology and evidence-based medicine. Worldwide there are many practicing clinicians or junior faculty members who desire to do simple projects related to clinical research but they hesitate for lack of appropriate training or experience. Similarly, the concept of evidence-based medicine has gathered international momentum and many seek to know how to practice it. There are few books written that focus on both of these two related areas, especially from the perspective of teaching the fundamentals. The primary author and his collaborating contributors all have extensive first-hand experience in practicing and teaching the approaches they write about. An international group of educators affiliated to renowned academic medical centres have put together this work, which will be welcomed by trainees and practitioners alike.
