New Generation Publishing, United Kingdom, 2011. Paperback. Book Condition: New. 231 x 155 mm. Language: English . Brand New Book ***** Print on Demand *****.JULY 1996: Israel builds a prototype of the world s first THEL - Tactical High Energy Laser weapon. The U.S agrees to co-fund further development.* MAY 2000 - AUGUST 2004: In tests THELs shoot down rockets, artillery shells and even multiple incoming mortar rounds. It is estimated that at a range of 5km probability-of-kill is virtually 100 *. DECEMBER 2004: Israel reduces its level of funding, amid serious concerns about THELs limited mobility and therefore practicality on the battlefield. The U.S agrees that there ll need to be a significant technical breakthrough.* SIX MONTHS AGO: While working on an unrelated project involving the world s leading tank armour, a small family run company in England, called Mason Electronics, quite literally cracks it. Using a high energy laser to blaze an ionised path through the air, they are able to release a huge burst of energy along this invisible conductor. Just like lightning. Only this is lightning with a difference. YOU CAN AIM IT. Recognising that they have created the ideal terrorist super weapon, the project is immediately cloaked in secrecy. Code named The Black Raven , only four people are even aware of its existence. TWO WEEKS AGO: A number of loyal retired employees, who still have a significant shareholding in Mason Electronics, notify the company that they ve been made a hugely attractive offer for their shares. Way too attractive for MD Frank Mason. Alarm bells start to ring. YESTERDAY: Mason s daughter goes missing.*Factual.
